

# Principal Civil Engineer

## About the role

How would you feel about working with a team of professionals in the Engineering, Surveying and Planning industries? Are you looking for stability and advancement in a supportive and diverse environment?

With over 40 years of development and growth in the industry and over 60 professionals working in Nationwide locations, these are just the beginnings of what this company can offer.

They are currently looking for a **Principal Civil Engineer** with a diverse range of skills to join their team.

## You will be;

- Providing engineering services to clients, using practical engineering solutions in a timely fashion. This often includes following the project from identification of issues to the construction of physical works remedies.
- Undertaking civil design, investigations, reports, and sketches to professional and relevant standards.
- Performing technical reviews and sign off engineering documentation.
- Providing support to other aspects of the engineering team as workload dictates, including project management, contract documentation and supervision, and client liaison.
